

4U'S GOLD STAR WORK OF THE WEEK!

What do plants need to stay alive?

This is what happens if you don't look after a plant. It will need light, water, fresh soil and space. Water is very important. It will need water to survive and stay alive as much as possible. ~~Soil~~ needs space so it can grow big and tall. Fresh soil is to keep it in the ground and also can be food. It is placed in a small space, with no light and ~~plants are~~ has no space. It also has no soil!

This plant has everything it needs. It is placed close to the window for sunlight but it is too close, the leaves will turn brown. It has lovely, fresh soil for it to stay healthy. It is also got all the water it needs. If you put in too much, it will drown out the good soil and the plant won't survive. Last, it has a big area of space. There is nothing blocking the sunlight and nothing to push it down.

Monday 27th April 2020.

PG 55
Set C:

1. $44 \div 11 = 4$

2. $56 \div 8 = 7 \times 8 = 56$

3. $96 \div 12 = 8 \times 12 = 96$

4. $49 \div 7 = 7 \times 7 = 49$

5. $81 \div 9 = 9 \times 9 = 81$

6. $90 \div 10 = 9$ $30 \div 3 = 10$ $10 \times 9 = 90$ $90 \div 3 = 30$

7. $144 \div 12 = 12$ $12 \div 2 = 6$ $144 \div 12 = 12$

$12 \times 12 = 144$ $144 \div 3 = 48$

8. $108 \div 12 = 9$

9. $63 \div 9 = \underline{7}$ $7 \times 9 = 63$

10. $100 \div 9 = 11$ $100 \div 12 = \underline{8}$

as the greatest number of raisins.
