

Does the shadow change when the torch is moved

By cherish Harris and
issac

Torch

Are experiment was to
see if the shadow
would get bigger or not
when the torch gets
closer to the object

The background of the image is a complex, abstract geometric pattern composed of numerous overlapping triangles. The color palette is a gradient of blues and cyans, ranging from deep, dark blue to bright, light cyan. The triangles vary in size and orientation, creating a dynamic and textured visual effect.

The data of the shadow results was 8cm 7cm 6cm 5cm
4cm 3cm

Are experiment didn't work because we didn't have a big light souce
