

RADZI'S CRAZY CREATIONS

ERUPTING VOLCANO

You will need:

- Empty plastic water bottle (300ml)
- Baking pan
- Play dough (any colours you like!)
- Washing-up liquid
- Baking soda
- Red food colouring
- Vinegar
- Measuring jug
- Tin foil
- Extras: soil, leafy twigs, plastic animals, toys, talcum powder (snow)

1. Stand the water bottle in the baking pan. You can secure the bottle with some play dough if required.

DO NOT COVER THE HOLE OR GET PLAY DOUGH IN IT.

2. Put 2 tbsp baking soda into the bottle, then add 1 tbsp washing-up liquid and a few drops of red food colouring.

3. Scrunch the tin foil into a volcano shape around the bottle, and then mould the play dough around it using your choice of colours.

4. Decorate your volcano with a choice of extras – twigs, animals and other toys – make it as impressive as possible!

5. Once you've made your volcano, using a measuring jug slowly pour vinegar into the bottle until you see foam rising to the top.

WATCH OUT... ERUPTION TIME!

Tips:

Put down some newspaper and wear some old clothes – this could get messy!

You can add some red, yellow or even purple food colouring for a funky coloured lava.

If you want to make a bigger volcano, just use a larger bottle!
